Sovereign Systems - About SOSA DevOps

---

## About SOSA DevOps

Version: 1.0.10  
Product: SOSA DevOps  
Developer: Sovereign Systems Co., Ltd.  
Location: Udon Thani, Thailand  
Contact: support@sovereignsystems.cc  
Website: https://sovereignsystems.cc

## What is SOSA DevOps?

SOSA DevOps is a local-first AI runtime for developers and technical teams. It runs entirely on your machine -- your data stays on your device and is never sent to external servers without your explicit consent.

The application is built with Tauri (Rust), React, and TypeScript. It is designed for privacy, transparency, and auditability from the ground up.

## Core features

- \* **Local AI runtime** -- Run open-weight language models (via Ollama) directly on your workstation, with no cloud dependency.
- \* **Privacy Filter** -- Automatically detects and redacts personal and sensitive information before any AI interaction, using on-device NLP (GLiNER + Presidio).
- \* **Audit Vault** -- Every significant action is cryptographically sealed in a local audit trail, giving you a verifiable record of all AI-assisted decisions.
- \* **Interaction Log** -- Full session history with export (JSON, CSV, Markdown). You own your data.
- \* **Personas** -- Configurable AI behaviour profiles for different contexts and workflows.
- \* **Deep Freeze state** -- Encrypted local state persistence. Your preferences and session context survive restarts without any cloud sync required.

## Privacy and compliance

SOSA DevOps is designed to comply with:

- \* **Thailand PDPA** (Personal Data Protection Act B.E. 2562)
- \* **GDPR** (General Data Protection Regulation, EU)
- \* **EU AI Act** (High-risk AI system transparency and audit requirements)

All AI interactions are logged, auditable, and exportable. The Privacy Filter runs entirely on-device with no outbound data transfer.

Sovereign Systems - About SOSA DevOps

---

See Privacy Policy and AI Disclosure in the Help menu for full details.

### Open source

SOSA DevOps is built on open-source components. See Open Source Licenses in the Help menu for the full dependency list and their respective licenses.

### Legal

SOSA DevOps is a product of Sovereign Systems Co., Ltd., incorporated in Thailand.

All intellectual property, source code, and trademarks are owned by Sovereign Systems Co., Ltd.

For vulnerability reports: [security@sovereignsystems.cc](mailto:security@sovereignsystems.cc)

### Acknowledgements

Built with Tauri, React, Rust, Ollama, GLiNER, Presidio, and the broader open-source AI ecosystem.

Made in Thailand.
